

1/2 the Cost of SMS 2x the Conversion

Sendbird Notifications makes it easy to launch and scale a persistent, in-app messaging experience that drives conversion beyond clicks.

Sendbird Notifications: A New Way to Reach & Convert Your Customers

✔ High-Converting & Interactive

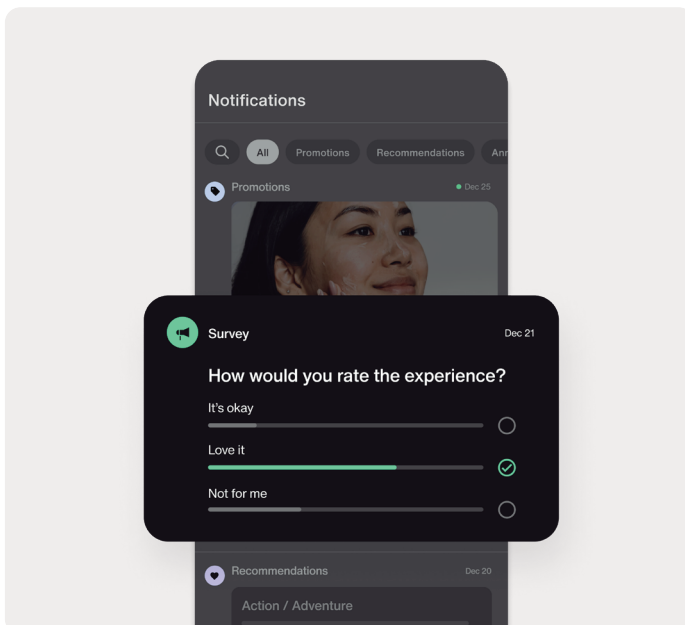

Drive desired user behavior with visually-engaging, rich interactive notifications. See 2X better CTR vs push & SMS.

✔ Persistent & Native Experience

Deliver always-accessible notifications in a customizable pre-built notification center or any screen in your app.

✔ Quick to Launch & Easy to Manage

Get to value fast with a UIKit and manage the channel with no dev resources. Send and scale in-app messaging easily and securely.

Drive conversions with fully-engaging and interactive rich notifications

• Rich Media Support:

Use images, GIFs, and videos in notifications that support your business needs

• Interactive:

Add buttons, polls, reactions, deep actions, and bi-directional messaging

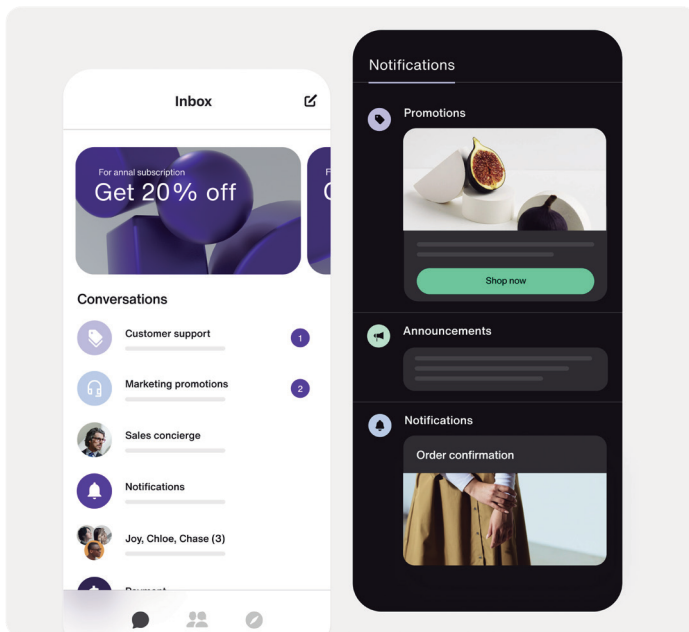

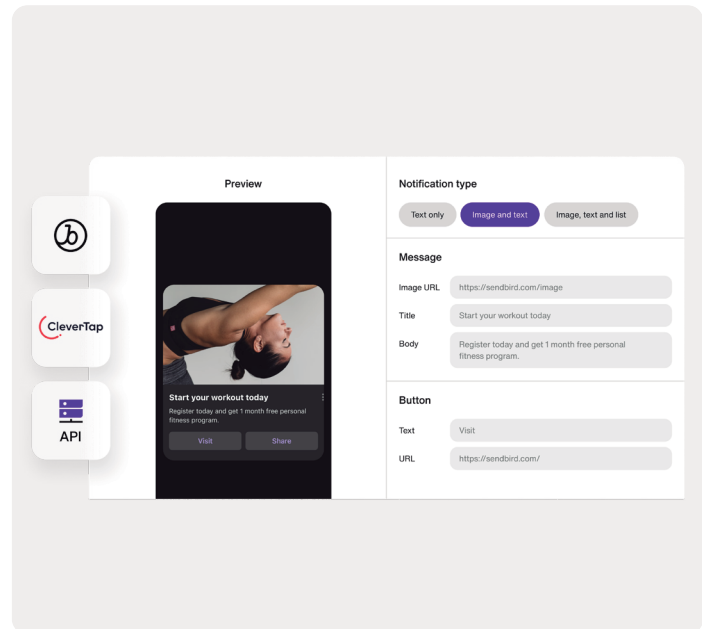

• Flexible:

Build notification templates to use again and again with no development resources required

Customize a fully native and persistent in-app notifications experience in a few clicks

- **Native in Your App:**
Easily build a persistent notification experience that exists seamlessly in your app
- **Customizable Views:**
Add a single view for all one-way messages or channels for each type of message
- **Anywhere in App:**
Deliver notifications in a conversion thread or any in-app screen

Launch in minutes and empower your business users to send mobile notifications at scale

- **Rapid Time-to-Value:**
Add notifications to your app in minutes using a low-code UIKit
- **Notifications at Scale:**
Connect your martech tool, like Braze or CleverTap, or create messages with a WYSIWYG editor and templates
- **Enterprise-Grade:**
Built on the same trusted platform that powers 7B messages and 300M users every month. Ready for any notification volume

Powered on the Sendbird platform
