

**DAILYMOTION  
ENTERPRISE**

# Deliver the best user experience

Dailymotion provides you a ready-to-use video solution with unlimited upload, transcoding, hosting, and bandwidth usage

# We are presenting Dailymotion Enterprise

Dailymotion Enterprise meets all your needs in terms of Video. Dailymotion's video platform dates back to 2005. Our global scalability and video expertise - we support over 3 billion views per month - allows us to meet all your video needs. We provide you a ready-to-use solution with unlimited upload, transcoding, hosting, and bandwidth usage. Your monthly or yearly fee is based on the number of video plays you generate. No setup fees or hidden costs according to your needs!

As a part of Vivendi, a 15 billion turnover group, Dailymotion is a global video distribution platform and video player technology provider with a unique team of 250 engineers working on the best-in-class video solution on the market.

## Features: You can have it all

### All inclusive

Easily upload, transcode, host, and distribute your videos across your different properties. For unlimited uploading capacity, transcoding, hosting, and bandwidth, pay a pre-established fixed monthly or yearly fee based on the number of videos plays you generate with no hidden cost

### Customization

Customize our video player to better convey your brand's image. You will benefit from a fully white-label video player by adding your brand's logo and colors..

### Video CMS

Easily manage your video on your account. Disable the monetization, geo-localize, and share videos to a restricted audience by turning on private mode or using password protection. You can also publish videos in public mode and benefit from Dailymotion's global audience!

### LIVE & VOD

Stream high-quality LIVE and VOD at top speed thanks to our lightweight and fast loading video player.

### Analytics

Track and optimize your video performance thanks to our advanced analytics tools. View statistics in real time on your Dailymotion account or through our reporting API.

### Support

Get help from our 24/7 Support if you have any product or technical question, such as catalog migrations or API integrations.

## ALL INCLUSIVE

# A comprehensive solution suitable for any business

---

### Easy upload without limits

Effortlessly update without limits. Ongoing uploads can be preserved and resumed for at least 12 hours, even in the presence of interruptions

### Hardware assisted transcoding

Publish videos in minutes with no limits. To ensure partner's videos are published as soon as possible, we rely solely on GPU-assisted video transcoding.

### Adaptive streaming across device

The media layer in our player implements an advanced HLS protocol client, and features like stream redundancy and bitrate auto-adjust are available out-of-the-box to deliver the best user experience from any device, anywhere.

## CUSTOMIZATION & VIDEO CMS

# Ad-free, customizable solution to fully control your strategy

Our ad-free, white-label player allows you to choose the color, type of buttons, or even player behavior such as sound, auto-play, video recommendation, etc. to match with your branding. Customers can also tailor distribution strategy to make videos visible to limited audiences through our CMS.

**LIVE & VOD**

## **Secure & easy Livestreaming**

Capture, encode and distribute your live stream cross-device and own the entire workflow.

### **CREATE VOD CONTENT INSTANTLY**

Any live stream ingested on the Dailymotion platform can be recorded, automatically generating on-demand content on the same channel. Even during live broadcasts, short highlights can be extracted from the DVR window and published as on-demand videos.

### **SECURE LIVE INGEST**

Dailymotion offers a "dual-path" live ingest feature, where partners may actually push the same live feed twice to set up a main and a backup Livestream. If the main Livestream encounters a problem, we fetch the backup stream, offering a seamless experience to users.

## ANALYTICS

# Comprehensive data to understand your performance

Easily manage your content and gain insights into content performance with an advanced analytics dashboard. Simplify hosting with a robust API and developer-friendly SDKs.

### REAL TIME ANALYTICS

Performance stats in real time & real-time player API events are available.

### FLEXIBLE ACCESS

Customers can access from CMS or through our reporting API based on your needs.

### CUSTOM DATA & REPORTS

Data can be filtered and segmented across multiple dimensions. Reports are available in csv. format.

### 3RD PARTY ANALYTICS

Player events can be integrated into your Google Analytics
